25TH ANNIVERSARY FACT

In May of 2009, Achen-Gardner Construction became the exclusive installer of Reline America Inc.'s Ultraviolet Light Cured-In-Place Pipe (UV CIPP) liner system in Arizona, Colorado, New Mexico, and Utah. This pipe rehabilitation technology utilizes a resin-and-fiberglass-reinforced liner and maximizes the capacity of the host pipe system. In the past five years we have rehabilitated more than 125,000 lineal feet of pipe using UV CIPP.
